

# CUCCIO VENEER CREAM GEL

cuccio™  
product portfolio

## DESCRIPTION

Highly pigmented creamy solid Cuccio Veneer cream gel. This formula enables one-stroke. Non-floating and silky features make it easy to apply and store. You can complete a lot of nail art work such as flower painting, line drawing and shading with it.

## INGREDIENTS

Ingredients for ALL six shades:

Acrylates copolymer,  
Isobornylmethacrylate, Trimethylbenzoyl  
Diphenylphosphine Oxide, Hydroxycyclohexyl  
Phenyl Ketone, Silica Dimethyl Silylate, MICA, +/-:  
CI 15850 (Red 6), CI 15850 (Red 7), CI 19140  
(Yellow 5), CI 77499 (Iron Oxides), CI 77891  
(Titanium Dioxide).

## FEATURES AND BENEFITS

- Gel polish doesn't move or run. It will stay where you apply it.
- The Solid Gel Polish Palettes are flat and compact and will save space.
- It is much easier for mobile nail artists to be able to travel with this palette. The palette contains many colours and will not spill.
- Some types of nail art are nearly impossible to do with bottled gel polishes because the consistency is too thin. With the thicker texture of solid gel polishes, you can easily create nail art that has finer details.
- Since solid gel polishes are quite pigmented, you can usually get a great colour payoff with just two, thin coats. This results in a sleek, natural looking nail.
- Easy to color, strong plasticity, no shrinkage, no wrinkle, no discoloration, after curing, the surface is flat, smooth, strong adhesion and other characteristics.

ITEM-CCGP6089

## DIRECTION FOR USE

- Step 1: Trim and file nails
- Step 2: Apply Base Coat and cure
- Step 3: Apply a layer of Cuccio Veneer Cream Gel and cure 60 seconds under LED light and repeat until desired coverage.
- Step 4: Apply topcoat and cure
